Volumes 2012/2013

RockIT volumes

ROCKIT is our latest series of volumes. They are manufactured using the Rocktopia technology and are the first real rock volumes with this size on the market. Until now, the features that they present- cracks and tufas – haven't been available on the market in the shapes of volumes.

The new RockIT volumes will now allow all indoor climbers to experience the feeling of climbing on real rock tufas and cracks.

HRT VOLUMES

Plywood volumes

The popular PYRAMIT volumes are now available equipped with a plywood base (the base is optional). Its great advantage is, that it connects the Pyramit to the wall, without screwing the volume directly to the wall and damaging it.
The connection between the Pyramit and the wall is in fact by usual M 10 bolts, screwed in the existing t-nuts of the wall. The outside part of the volume is after that connected to the already installed base using 5 x 50 mm screws. The cuts in the bases of the volumes are made in a way, that makes them possible to use on walls with any distance between the t-nuts, and at the same time having at least 3 attachment points. They also allow the rotating of the Pyramit at several positions.

PYRAMIT
BOLT-ON

8 A/C 7 A/C 6 A/C 5 A/C

Step 1:
bolt the base of the Pyramit to the wall, using the existing t-nuts for holds.

Step 2:
screw the Pyramit to the previously installed base.

COMPOZIT technology has allowed us to rediscover HRT GIGA holds. Because of the extreme reduction of their weight, it is much more easy and safe to mount them on the wall or change their position as often as needed.
GIGA holds have numerous ways for positioning, which gives route-setters and climbers a huge variety of usage and approaches.
Some of the models have additional t-nuts for adding smaller holds on the giga holds.

HRT VOLUMES

GRP VOLUMES:

The GRP volumes are manufactured by the same technology and material as the panels for the GRP climbing walls. They are especially suitable for mounting on plywood walls. They are easily installed with screws and their places and positions could be changed at any time.

Some of the volumes have additional t-nuts for mounting climbing holds on them, thus increasing even more the possibility for variety on the wall.
